TECHNICAL SKILLS

- Programming Languages: C, C++, Python
- Web Technologies: HTML, CSS, JavaScript
- Tools & Platforms: Git, GitHub

PROJECTS

MemoryVerse | HTML, CSS, JavaScript (Solo Project)

- Built a browser-based memory-matching card game from scratch using HTML, CSS, and JavaScript, featuring multiple themes (Fruit, Plant, Human) and progressively challenging levels.
- Implemented core game logic including card-flip matching, move and timer tracking, and a level-completion system with star-based scoring.
- Designed user authentication (sign-up/login) with input validation, plus a profile dashboard tracking games played, score, and level progress.
- Added a leaderboard and achievements system to rank players and drive user engagement.

NOVA - Neurodiverse Online Virtual Academy | HTML, CSS, JavaScript (Solo Project)

- Built an accessible e-learning platform for neurodiverse students, offering subject modules (Math, Geography, etc.) with concept summaries, interactive lessons, and quizzes.
- Designed dedicated ADHD Mode (Pomodoro focus timer, one-task-at-a-time view, visual progress tracking) and Dyslexia Mode (OpenDyslexic font, reading ruler, adjustable line spacing) to support different learning needs.
- Integrated text-to-speech read-aloud with selectable voice, language, and playback speed to improve content accessibility.
- Built a quiz engine with instant scoring, a points/leaderboard system, and a stats dashboard (points, chapters completed, quizzes taken, average score) with performance charts, plus user authentication and a daily quiz challenge.
